

Project Charter: Portfolio Presenter

Define the vision

Description	Currently, there is no formal medium to present my CV or effectively share resources such as project charters, requirement specifications, source code, or demos. This lack of a centralized platform hinders my ability to showcase my professional identity in an accessible and organized manner, impacting how potential employers, collaborators, and other stakeholders perceive my work.
Purpose	To develop a system that effectively communicates my CV and showcases completed projects, providing a clear and comprehensive view of my professional capabilities to potential employers, collaborators, and other stakeholders.
Goals	<p>Present four projects to provide initial insight into the processes used in my work.</p> <p>Highlight the skills and competencies applied in these projects, showcasing areas of focus and expertise.</p> <p>Ensure the platform is user-friendly and engaging to facilitate easy navigation and understanding.</p>
Scope	<p>This project includes the development of:</p> <ul style="list-style-type: none"> ● Project Presentation System: A platform to display and detail various projects. ● Analytics System: Tools to track and analyze visitor interactions and engagement.
Costs	<p><u>Tangible</u></p> <ul style="list-style-type: none"> ● Hosting services ● Domain registration ● Time for development ● Application development ● Refining existing resources
Benefits	<p><u>Intangible</u></p> <ul style="list-style-type: none"> ● A guiding resource for future projects. ● Enhanced visibility and professional credibility. ● A reflective tool that highlights my professional journey. ● A comprehensive platform that showcases my completed and ongoing projects.
